

ISKONNECT Production Database Verification Report: Group B Scholarship Audits & Database Mappings

Executive Verification Protocol & Architecture

The ISKONNECT scholarship matching platform operates an automated engine designed to process student profile vectors against financial assistance programs across public, institutional, and private sectors. To eliminate false-positive recommendations that direct applicants to ineligible programs and false-negative omissions that suppress viable funding, this report establishes the canonical verification ground truth for all database records that have not yet undergone canonical auditing.

Enterprise database updates require deterministic verification: every eligibility parameter must be validated against Tier 1 primary evidence, mapped to explicit SQL data types, and reconciled with governing agency mandates. Where an official provider document or governing policy does not explicitly state a requirement, platform protocol mandates designating the field as NOT SPECIFIED IN OFFICIAL SOURCE rather than introducing unverified assumptions.

Tier 1: Official Sources (.gov.ph, Official Portals, Downloadable Guidelines, CMOs/PPGs)

└─ Tier 2: Official Announcements (Press Releases, FAQs, Official Social Advisories)

└─ Tier 3: Trusted Secondary Sources (PhilScholar, University Scholarship Offices)

└─ Tier 4: Unverified Aggregators & Forums [DISCARDED]

Data verification strictly follows a four-tiered authority hierarchy:

- **Tier 1 (Highest Authority):** Direct government agency web portals (.gov.ph), official provider portals, downloadable policy guidelines, CHED Memorandum Orders (CMOs), GSIS Policy and Procedural Guidelines (PPGs), DOST Administrative Orders, and official application portals.
- **Tier 2 (Official Announcements):** Press releases, downloadable application instructions, official FAQs, and direct advisories published by scholarship secretariats.
- **Tier 3 (Trusted Secondary Sources):** University scholarship office notices and recognized educational registries used exclusively to locate primary documentation. Tier 3 data cannot override Tier 1 or Tier 2 mandates.
- **Tier 4 (Unverified Sources):** Blogs, student forums, social media aggregators, and unverified AI summaries. These sources are permanently excluded from live database updates.

Group A: Canonically Verified Scholarships (Excluded

from Re-Research)

Per platform protocol, scholarship programs that have already received complete canonical verification reports are assigned to **Group A**. These entries are excluded from re-research to prevent redundant processing while maintaining database mapping consistency across the system.

Systemic Database Audit & Comprehensive Anomaly Matrix

A comprehensive structural audit comparing the live database state (public.scholarships, timestamp 2026-08-05) against official primary mandates reveals data corruptions, missing fields, incorrectly archived active programs, and logic mismatches across Group B entries.

Scholarship ID	Title in Live Database	Live DB State	Canonical Provider Mandate	Primary Discrepancy & Engine Impact
54	CHED Medical Scholarship and Return Service (MSRS)	max_income: 600000, total_value: 250000	CMO No. 10 s. 2026 sets max income PHP 450,000.00. Direct stipends equal PHP 183,000.00/yr + variable TOSF.	Income Ceiling Corruption: Engine will falsely qualify applicants earning between P450k-P600k, leading to CHED rejection.

Scholarship ID	Title in Live Database	Live DB State	Canonical Provider Mandate	Primary Discrepancy & Engine Impact
	78	GSIS Subsidy for STEM Program (GSSP)	min_gwa: 90, allowance_mo: null	Active under PPG 421-25. Entry GWA $\geq 90\%$; renewal GWA $\geq 85\%$. Parent must be Salary Grade 15 or below.
7	GSIS Scholarship Program	allowance_mo: 4000, total_value: 90000	Official GSP rules mandate PHP 2,000.00/month stipend and PHP 40,000.00 tuition cap (Total P60k/yr).	Overstated Benefit Value: Engine over-calculates financial awards by P30,000/year.
117	CoScho (Coconut Farmers Scholarship)	min_gwa: 80, max_income: 300000	Active under CHED / PCA CFIDP framework. Requires NCFRS coconut farmer registration.	Missing Sectoral Tag: Engine cannot filter for NCFRS registration, resulting in false positives for general agriculture students.
119	CHED Estatistikolar	min_gwa: 80, max_income: 500000	Active under CMO No. 4 s. 2024. Restricted strictly to BS Statistics degree programs.	Missing Degree Restriction: System presents scholarship to general science students not enrolled in BS Statistics.
57	DSWD AICS Educational Assistance	total_value: 4000, cycle_type: rolling	Emergency financial aid grant, not a multi-year academic scholarship. Outright cash assistance up to P4,000.	Type Misclassification: Emergency assistance mixed into academic scholarship matching tables.
88 & 89	Quezon City Scholarship Program Tracks	is_active: true, max_income: 400000	Active under SP-3283 S-2024. Requires QCitizen ID and non-enjoyment of	Missing LGU Exclusivity Tag: Engine fails to filter out candidates who hold other

118	SIDA-SGP Sugarcane Industry Scholarship	max_income: 400000, tuition: false	Active CHED track for sugarcane industry workers/dependents. Total value P110,000/yr.	Missing Sectoral Tag: Lacks sugarcane worker SIDA registration tag.
120	SIKAP Faculty Grant	levels: ["Graduate", "Faculty"]	Active CHED grant for Higher Education Institution faculty members.	Target User Mismatch: Must be tagged as an institutional employment grant rather than a student entry grant.
133, 134, 135, 136	DOST Graduate Tracks (ASTHRDP, ERDT, CBPSME, STRAND)	is_active: true, confidence_score: 0.05	Active DOST-SEI graduate scholarship tracks. Require university endorsement and S&T priority research focus.	Incomplete Database Mapping: Scores and completeness parameters set near zero (0.05), causing low ranking in search results.
124	OWWA ELAP Assistance	levels: ["College", "Senior High School"]	Active program for dependents of deceased or incapacitated OFWs. Max income P250,000.	Missing Beneficiary Constraint: Lacks tag for deceased/incapacitated OFW parent status.
85 & 86	OWWA EDSP and ODSP	min_gwa: 80, total_value: 60000 / 20000	Active OWWA merit and need scholarship tracks. Require active OWWA member contribution status.	Missing Member Tag: System fails to validate active OWWA membership of parent.

## Multi-Stage Engine Matching Pipeline Architecture

To enforce these canonical updates, the live matching engine must route user profile vectors through a strict three-stage pipeline:

1. **Stage 1: Hard Level & Temporal Filtering**
  - Verifies whether user.year\_level is contained within scholarship.eligible\_year\_levels.
  - Enforces user.earned\_college\_units == 0 if scholarship.incoming\_year\_only is set to true.
  - Validates user.is\_currently\_enrolled against scholarship.requires\_current\_enrollment.
2. **Stage 2: Quantitative & Socioeconomic Eligibility Bounds**
  - Evaluates user.gwa >= scholarship.minimum\_gwa.
  - Confirms user.family\_income <= scholarship.income\_limit.
  - Checks user.parent\_salary\_grade <= 15 for GSIS GSSP (ID 78).
3. **Stage 3: Institutional, Sectoral & Course Validation**
  - Matches user.course\_code against scholarship.degree\_program\_restricted.
  - Verifies user.sectoral\_status (e.g., NCFRS registration for CoScho ID 117).
  - Enforces LGU residency and non-enjoyment of other LGU grants (e.g., QCitizen ID for QCSP ID 88).

Executing these database updates and pipeline enhancements aligns the live ISKONNECT database with canonical provider rules, eliminating false recommendations and providing Filipino students with reliable scholarship matching results.
