

Canonical Verification Report for ISKONNECT Scholarship Database

This canonical verification report establishes the definitive ground truth for sixteen local government unit (LGU) and specialized scholarship programs within the ISKONNECT scholarship matching platform¹. To prevent false-positive recommendations that direct applicants toward ineligible grants and false-negative omissions that conceal viable funding, each scholarship record has been audited against Tier 1 primary evidence, including government portals, official ordinances, downloadable citizen charters, and governing executive orders².

Per ISKONNECT verification protocol, fields not explicitly declared in primary source documentation are designated as NOT SPECIFIED IN OFFICIAL SOURCE to preserve deterministic database mapping².

Systemic Matching Engine Architecture & Operational Recommendations

Executing these database updates and pipeline enhancements aligns the live ISKONNECT matching engine with canonical provider rules, mitigating false recommendations and presenting Filipino students with accurate matching results².

1. **Local Government Unit Exclusivity Filtering:** Programs such as the Quezon City Scholarship Program (ID 88) explicitly prohibit dual enjoyment of other LGU grants². The system must evaluate lgu_exclusivity_clause to prevent candidates already holding local grants from receiving invalid matches².
2. **Household Concentration Caps:** Pasig City's One-Scholar-One-Family Policy (ID 25–94)⁶ and Davao City's One-Child-Per-Family Rule (ID 37, 38, 101, 102, 103)¹³ represent strict administrative constraints. The engine must check active sibling grants within the user family profile before rendering recommendations⁶.
3. **Dynamic Grade Band Allocation:** Davao City's STEP-FA program (Categories A, B, and C) divides funding levels based on GWA brackets ($\geq 93\%$, $90\% - 92.99\%$, and $80\% - 89.99\%$)¹². Implementing maximum_gwa_cap ensures applicants are routed to the specific tier that maximizes their financial award¹².
