

Canonical Verification Report: Group B Private Foundation Scholarships for the ISKONNECT Matching Engine

Executive Summary & Verification Protocol

The ISKONNECT scholarship matching platform operates an automated recommendation engine designed to process student profile vectors against higher education financial assistance programs across public, institutional, and private sectors in the Philippines. To eliminate false-positive recommendations that direct applicants to ineligible programs and false-negative omissions that suppress viable funding, this report establishes the canonical verification ground truth for all Group B database records that have not yet undergone canonical auditing.

Enterprise database updates require deterministic verification: every eligibility parameter must be validated against Tier 1 primary evidence, mapped to explicit SQL data types, and reconciled with governing agency mandates. Where an official provider document or governing policy does not explicitly state a requirement, platform protocol mandates designating the field as NOT SPECIFIED IN OFFICIAL SOURCE rather than introducing unverified assumptions.

Data verification strictly follows a four-tiered authority hierarchy:

- **Tier 1 (Highest Authority):** Direct government agency web portals (.gov.ph), official provider portals, downloadable policy guidelines, CHED Memorandum Orders (CMOs), GSIS Policy and Procedural Guidelines (PPGs), DOST Administrative Orders, and official application portals.
- **Tier 2 (Official Announcements):** Press releases, downloadable application instructions, official FAQs, and direct advisories published by scholarship secretariats.
- **Tier 3 (Trusted Secondary Sources):** University scholarship office notices and recognized educational registries used exclusively to locate primary documentation. Tier 3 data cannot override Tier 1 or Tier 2 mandates.
- **Tier 4 (Unverified Sources):** Blogs, student forums, social media aggregators, and unverified summaries. These sources are permanently excluded from live database updates.

Per platform protocol, scholarship programs that have already received complete canonical verification reports (e.g., DOST-SEI Undergraduate and JLSS, CHED BPMSP, CHED CMSP, CHED MSRS, Megaworld Foundation, SM Foundation, GSIS GSSP, CHED CoScho, and Quezon City Scholarship Program) are assigned to Group A and are excluded from re-research. This report presents exhaustive canonical audits for all seven target private foundation scholarships under Group B.

Ayala Foundation U-Go Scholar Grant (ID: 11)

7. Required Documents

1. Duly accomplished online application form.
2. Current official Certificate of Registration / Enrollment signed by the registrar with wet signature.
3. Latest copy of grades / Transcript of Records signed by the registrar with wet signature.
4. Proof of financial need (Parents' or guardians' most recent Income Tax Return [ITR], BIR Tax Exemption Certificate, Barangay Certificate of Indigency, or OFW/seafarer contract/proof of income).
5. Proof of college admission or Senior High School diploma (for incoming 1st-year students).
6. Recent copy of electric or water bill (if available).
7. Official Recommendation Letter (for shortlisted applicants).

8. Renewal Requirements

- Maintain GWA: Maintain a minimum GWA of 85.00% or equivalent each academic term.
- Regular Load: Full-time credit load per term in a public/state university.

- No Failures: Zero failing grades.
- Return Service: None.

9. Disqualifying Conditions

- Male gender.
- Possession or active enjoyment of any other scholarship grant.
- Enrollment in a private higher education institution.
- Students expecting to graduate during the current academic year.
- GWA below 85.00% or presence of failing/incomplete grades.
- History of administrative or disciplinary sanctions.

10. Temporal Eligibility Matrix

| User Profile | Eligibility Status | Actionable Guidance | | :--- | :--- | :--- | | Female SHS Graduating Student (Entering SUC) | Eligible Now | Submit eligibility form during open application window. | | Female 1st/2nd/3rd Year College Student (SUC) | Eligible Now | Submit grades and proof of enrollment during open window. | | Female 4th Year College Student (4-year Degree) | Ineligible | Barred as graduating student; program excludes final-year graduates. | | Female 4th Year College Student (5-year Degree) | Eligible Now | Eligible for 4th year entry; funding covers final 2 years. | | Male College Student (Any Year Level) | Ineligible | Program strictly restricted to female students. | | Female College Student with Existing Grant | Ineligible | Exclusivity rule prohibits dual scholarship enjoyment. |

11. Structured Eligibility Matrix

13. Matching Risks

- Gender Mismatch: Live database state currently lacks a gender filter tag. Displaying ID 11 to male applicants creates false positives.
- Private School False Positives: System must filter user.school_type == 'SUC' OR 'LUC'. Enrolled private university students will be rejected immediately.
- Dual Grant Violation: Automated matching engine must verify user.has_existing_scholarsh[span_113](start_span)[span_113](end_span)ip == false.

- Maintain GWA: Maintain a minimum semester GWA of 85.00% or university passing standards.
- Regular Load: Full-time credit enrollment per term in approved priority course.
- No Failures: Zero failing grades in enrolled subjects.
- Return Service: None.

9. Disqualifying Conditions

- Enrolling in non-partner higher education institutions.
- Combined annual family income exceeding PHP 500,000.00.
- GWA dropping below 85.00% or presence of failing grades.
- Failure to pass MBFI qualification examination or interview evaluation.

10. Temporal Eligibility Matrix

User Profile	Eligibility Status	Actionable Guidance
Incoming Freshman (Partner HEI, Priority Course)	Eligible Now	Apply via partner university scholarship office during open window.
Incoming Sophomore (Partner HEI, Engineering)	Eligible Now	Apply for 2nd-year Engineering track intake.
Incoming Sophomore (Partner HEI, Non-Engineering)	Ineligible	Non-engineering upperclassmen entry is barred.
Enrolled Student at Non-Partner University	Ineligible	Program strictly restricted to MBFI partner HEIs.
Family Income > PHP 500,000	Ineligible	Exceeds official household income ceiling.

13. Matching Risks

- Partner School Verification: Program relies on partner university agreements. Engine must restrict matches to user.school_id IN (smf_partner_schools).
- Host Community Tagging: Lack of an explicit host community residency filter in user profile vectors may lead to non-priority applicant matches.

Multi-Stage Engine Recommendation Pipeline Architecture

The automated recommendation algorithm processes applicant vectors through three sequential filtering stages to guarantee data compliance:

1. **Stage 1: Hard Level, Temporal, and Gender Filtering**
 - Verifies whether user.year_level is contained within scholarship.eligible_year_levels.
 - Enforces user.earned_college_units == 0 whenever scholarship.incoming_year_only is set to true.
 - Validates strict demographic and intake constraints, such as verifying user.gender == 'FEMALE' for the Ayala Foundation U-Go Grant (ID 11) or restricting entry strictly to user.year_level == 2 for the Aboitiz Future Leaders Scholarship (ID 75).
2. **Stage 2: Quantitative and Socioeconomic Eligibility Bounds**
 - Evaluates user.gwa >= scholarship.minimum_gwa or checks whether user.class_rank <= scholarship.rank_cutoff_alternative (such as the Top 10% batch rank required for freshman applicants under GBF STEM ID 72).
 - Confirms user.family_income <= scholarship.income_limit (such as enforcing the PHP 250,000.00 ceiling for Gabay Guro ID 16 or PHP 500,000.00 for MBFI ACCESS ID 13).
 - Enforces program exclusivity rules by validating user.has_existing_scholarship == false for Ayala U-Go (ID 11) and user.has_corporate_foundation_grant == false for Aboitiz Brights (ID 75).
3. **Stage 3: Institutional, Sectoral, and Course Validation**
 - Matches user.school_id against the partner_schools database table whenever scholarship.partner_school_restricted is set to true.
 - Verifies user.course_code against approved priority degree arrays (such as restricting Gabay Guro ID 16 strictly to BEED and BSSED majors, or matching STEM disciplines for GBF ID 72).
 - Validates specific sectoral attributes, such as verifying next-of-kin documentation for COVID-19 medical frontliners under the BPI Foundation Pagpupugay Scholarship (ID 14).

Executing these database updates and architectural pipeline enhancements aligns the live ISKONNECT scholarship database with canonical provider rules, eliminating false recommendations and providing Filipino students with reliable scholarship matching results.
